KEYSTONE ACCESSIBILITY

Three Measurements We Need

Pollock Homelift — site check for the contractor

Please measure and write in the three dimensions below, then send this sheet back to us. All measurements are **finished floor to finished ceiling** — carpet, tile and underlayment in place, not subfloor. Measure at the spot where the lift will sit, and note the smallest reading if the ceiling is uneven.

C Upper floor — ceiling height

Finished floor of the upper level up to the underside of its ceiling, measured over the lift position.

_____ inches

B Intermediate floor — thickness

Underside of the lower ceiling up to the top of the upper finished floor — joists, subfloor and finish together.

_____ inches

A Lower floor — ceiling height

Finished floor of the lower level up to the underside of its ceiling.

_____ inches

SKETCH OR NOTES — OBSTRUCTIONS, CEILING SLOPE, ANYTHING UNUSUAL

JOB / ADDRESS _____

MEASURED BY _____

DATE _____

Send the completed sheet back to **Keystone Accessibility** — we size the lift from these three numbers.

Empowering Independence. Enhancing Lives.
